### **#7: Aditi Shankardass**

**The Speaker:** [Aditi Shankardass](#) is a neuroscientist at the Communicative Disorders Department, California State University.

**Why We Love Her:** Aditi pioneered the use of EEG technology to give children with developmental disorders their most accurate diagnosis, such as to identify the neurological causes of dyslexia. She is also actively involved in public outreach as a board member of the Global Neuroscience Initiative Foundation and as a consultant for BBC Science Line.

#### [Ted Talk](#)

"These EEG scans enabled us to provide these children with a much more accurate neurological diagnosis and a much more targeted treatment," Aditi Shankardass.
